

ECHO Technical Committee Meeting 10.29.2013

ECHO has been replaced by the [Common Metadata Repository \(CMR\)](#), a high-performance, high-quality, continuously evolving metadata system that catalogs all data and service metadata records for the EOSDIS system and will be the authoritative management system for all EOSDIS metadata.

ECHO System Status

System Issues

- 10/16: Operations outage due to issues with NSIDC rest ingest transition.
- 10/16: Operations outage due to GSFC-wide connectivity issue
- 10/23: Partner Test outage due to USGS_EROS testing of Landsat-8 ingest causing disk space issues on our database machine. This had a knock-on effect of preventing orders from being fulfilled in partner test. As of 10/28/13 this issue has been resolved.
